ACCORDING to statistics just published, the stream of emigration from the United States has been steadily increasing in the last few years, though it still remains stronger and deeper than in the period between 1875 and 1880. The number of emigrants in the current year the total number of emigrants was 65,245, as compared with 50,311, with 94,145, with 117,801, and with 120,139 in the same months of 1884, 1883, 1882 and 1881, respectively. Frequent reports have of late been made of the alarming increase of the use of opium and morphine in this country, especially among women. But it seems that the use of these drugs is spreading everywhere. In Spain and France opium is used more freely than ever as a preventive of cholera. In Russia, where the use of opium is not so common, the thermometer showing an average exceeding anything that has been known in 140 years, opium is being used as a means to keep cool and quiet. The Russians, who are hard drinkers, are afraid to indulge in the use of alcohol during the extremely hot weather, and seem to have partially exchanged it for opium, probably upon the authority of reports who have indulged in it almost all their lives, and who aver that, far from distorting the mental faculties of men as alcohol does, opium sustains them, and renders them unusually bright and good-willed the next day.
